

VIDYATRACK – LESSONS LEARNED DOCUMENT

1. Document Overview

Document Name: VidyaTrack – Lessons Learned

Pilot School:

Pilot Duration:

Prepared By:

Date:

Purpose:

To capture key learnings from the pilot implementation of VidyaTrack in order to improve product readiness, operational processes, and future deployments.

2. What Went Well

Product Strengths

- Attendance marking was completed successfully on a daily basis.
- Same-day attendance edit reduced teacher errors.
- Marks entry with mandatory remarks improved clarity for parents.
- Consolidated exam results reduced confusion.
- Student notes helped maintain academic continuity during teacher changes.
- Role-based access control worked as expected.

Operational Strengths

-
- Teachers adapted to the system with minimal training.
 - Management was able to configure school structure without technical help.
 - Principal found read-only access sufficient for oversight.
 - Parent communication via WhatsApp/SMS was effective.

3. What Did Not Go Well

Operational Challenges

- Internet connectivity issues caused delays in some submissions.
- OTP delivery delays occurred occasionally.
- Initial teacher onboarding required hand-holding.

Process Gaps

- Some teachers delayed attendance entry until end of day.
- Manual follow-up was required for missing parent phone numbers.
- Limited visibility into notification failures during early pilot days.

4. Key Risks Observed

- Dependency on internet connectivity at school premises.
- Reliance on OTP-based authentication for daily access.
- Human error during initial data setup (students, subjects).

5. Mitigations That Worked

- Retry-safe submissions prevented duplicate data.
- SMS fallback ensured parent notifications were delivered.
- Append-only student notes prevented loss of context.

- Read-only enforcement protected academic data integrity.

6. Stakeholder Feedback Summary

Teachers

- Preferred simple, fast workflows.
- Valued same-day attendance edit.
- Requested clearer confirmation messages.

Principal

- Appreciated consolidated academic visibility.
- Did not require edit access.
- Found parent communication useful.

Management

- Setup workflows were manageable.
- Teacher replacement feature was critical.
- Read-only oversight met governance needs.

7. Lessons Learned (Key Takeaways)

- Simplicity is critical for teacher adoption.
- Same-day edit windows reduce operational friction.
- Consolidated communication is preferred over fragmented messages.
- Permission-driven access prevents misuse and confusion.
- Academic continuity must be preserved across staff changes.
- Pilot monitoring and support are essential during early days.

8. Recommended Improvements (Post-Pilot)

Process Improvements

- Strengthen onboarding checklist for new schools.
- Validate parent contact data before go-live.
- Define clear daily operational cut-off times.

Product Improvements

- Improve visibility of notification delivery status.
- Add clearer submission success indicators.
- Enhance resilience for low-connectivity environments.

9. Impact on Future Rollout

- Pilot approach validated for similar schools.
- Role-based documentation should be reused.
- Training material must be standardized.
- Support readiness is mandatory for scale.

10. Conclusion

The pilot demonstrated that VidyaTrack meets its core objectives for school operations, academic tracking, and parent communication. Lessons learned from this pilot will guide refinements and ensure smoother future deployments.
