

VIDYATRACK – PILOT QA SIGN-OFF DOCUMENT

Product: VidyaTrack

Pilot Phase: School Pilot Deployment

QA Owner: Risk & QA Reviewer

Sign-off Date: _____

Environment: Pilot / Production-like

1. PURPOSE OF THIS DOCUMENT

This document formally confirms that VidyaTrack has met the agreed

Quality Assurance Definition of Done (DoD) for the pilot phase.

It certifies that:

- Critical risks are identified and mitigated
- Core workflows are verified end-to-end
- Known limitations are explicitly accepted
- The system is safe to be used by real schools in a pilot context

2. PILOT QA SCOPE COVERED

ROLE-BASED TESTING (COMPLETED)

- Teacher:
 - OTP authentication
 - Attendance entry & same-day edit
 - Marks entry with submission flow
 - Student notes (append-only)
 - Scope-limited access enforcement
- Principal:
 - OTP authentication
 - Read-only dashboards
 - View students, teachers, attendance, marks
 - Parent communication (read-only academic context)
- Management:
 - OTP authentication
 - Academic structure setup (classes, sections, subjects)
 - Teacher & principal lifecycle management

- Student creation
- Teaching assignments
- Parent communication
- Configuration locking

CROSS-CUTTING QA (COMPLETED)

- Role boundary enforcement (Teacher / Principal / Management)
- Permission validation (RBAC)
- Data integrity & idempotency
- Notification reliability (WhatsApp → SMS fallback)
- Auditability of critical actions
- Data deletion safety (no orphan data)
- Performance sanity at pilot scale
- Backup & restore drill
- Timezone & date-boundary validation (IST)

3. CRITICAL FLOWS VERIFIED (P0)

- Attendance:
 - One submission per date/section
 - Same-day edit only
 - No duplicate or partial records
- Marks:
 - All students required before submission
 - Assignment-based access enforced
- Notifications:
 - Correct recipient mapping
 - No duplicate sends
 - Fallback mechanism validated
- Teacher replacement:
 - Academic continuity preserved
 - No historical data loss
- Read-only enforcement:
 - Principal & Management cannot mutate academic data

4. DATA INTEGRITY & SECURITY CONFIRMATION

- Tenant isolation enforced (no cross-school data access)
- Role-based access enforced at backend (UI bypass safe)
- No orphan attendance, marks, notes, or assignments

- All write actions attributable to a user and timestamp
- Student and parent data exposure minimized

=====

5. KNOWN PILOT LIMITATIONS (ACCEPTED)

=====

The following are explicitly accepted for the pilot phase:

- No retroactive attendance edits after day end
- No partial exam result notifications
- No parent login access (notifications only)
- No advanced analytics or reports
- No bulk historical data correction tools

These limitations are documented and communicated to pilot stakeholders.

=====

6. GO / NO-GO ASSESSMENT

=====

P0 Defects: 0

P1 Defects: 0 (or explicitly accepted)

P2/P3 Defects: Accepted for pilot

Overall QA Status: **GO FOR PILOT**

=====

7. PILOT SAFETY CONTROLS IN PLACE

=====

- Management configuration lock available
- Backup & restore procedure verified
- Incident response paths defined
- Monitoring for notification failures available
- Controlled scope and feature freeze enforced

=====

8. QA SIGN-OFF

=====

I confirm that VidyaTrack meets the agreed pilot Definition of Done from a Quality Assurance, Risk, and Data Integrity perspective.

This sign-off authorizes pilot deployment under the documented scope and limitations.
