

VIDYATRACK – PRODUCT HANDOFF SUMMARY

(QA → Product / Delivery / Stakeholders)

Product Name: VidyaTrack

Phase: Pilot Launch

Handoff From: QA / Risk Review

Handoff To: Product Owner, Tech Lead, Delivery, Stakeholders

Date: _____

1. PURPOSE OF THIS HANDOFF

This document formally hands over VidyaTrack from **QA validation** to **pilot execution**, confirming what is:

- Ready and supported
- Locked and frozen
- Explicitly out of scope for pilot
- Operationally expected during pilot

This ensures **shared understanding** across product, tech, and business.

2. PILOT-SUPPORTED ROLES

- Teacher
- Principal
- Management

Parents are **notification recipients only** (no login).

3. FUNCTIONAL SCOPE – CONFIRMED READY

TEACHER

- OTP-based login (active users only)
- Daily attendance entry (once per day)
- Same-day attendance edit only
- Marks entry and submission (assignment-based)
- Mandatory remarks for marks
- Student notes (append-only)
- Strict scope enforcement (assigned sections/subjects only)

PRINCIPAL

- OTP-based login
- Read-only dashboards
- View students, teachers, attendance, marks
- View student notes
- Parent communication
- No create/edit/delete access

MANAGEMENT

- OTP-based login
- School setup:
 - Classes
 - Sections
 - Subjects
- Staff management:
 - Teacher registration
 - Principal registration (single active)
 - Teacher activation/deactivation
 - Teacher replacement (data preserved)
- Teaching assignments
- Student creation
- Read-only academic oversight
- Parent communication
- Management configuration locking

=====

4. DATA & SYSTEM GUARANTEES

=====

- Tenant isolation (no cross-school data access)
- Role-based access enforced at backend
- Attendance:
 - No duplicates
 - Same-day edit only
- Marks:

- Submission only after full entry
- Assignment enforcement
- Notifications:
 - WhatsApp primary
 - SMS fallback
 - Idempotent delivery
- Academic continuity preserved during teacher replacement
- All critical write actions auditable

5. OPERATIONAL SAFETY CONTROLS

- Management Access Lock available
- Backup & restore procedure verified
- Notification outbox worker operational
- Retry-safe submissions under poor connectivity
- Timezone handling aligned to IST

6. EXPLICIT PILOT LIMITATIONS (LOCKED)

The following are ****intentionally NOT supported**** in pilot:

- Retroactive attendance edits (past days)
- Partial exam result notifications
- Parent login or parent dashboards
- Advanced analytics or reports
- Bulk data correction tools
- Mid-pilot schema or workflow changes

These are accepted and communicated limitations.

7. CHANGE CONTROL DURING PILOT

- No new features
- No schema changes
- No permission changes
- Only:
 - Bug fixes (P0/P1)
 - Operational configuration changes (if required)

All changes require Product + Tech approval.

=====

8. SUCCESS CRITERIA FOR PILOT

=====

Pilot is considered successful if:

- Attendance is marked daily without data loss
- Marks submission completes per exam cycle
- Parents reliably receive notifications
- Teachers continue usage without confusion
- No data integrity incidents occur

=====

9. OWNERSHIP POST-HANDOFF

=====

- Product: Scope control, stakeholder communication
- Tech: Stability, fixes, deployments
- QA: Incident validation, regression verification
- Delivery: Pilot coordination and reporting

=====

10. FINAL HANDOFF CONFIRMATION

=====

This handoff confirms VidyaTrack is **fit for pilot execution** within the documented scope and limitations.

Any deviations must follow the agreed change control process.
