

VIDYATRACK FEATURES AND USER STORIES

=====

ROLE: TEACHER

=====

Feature: Teacher Authentication & Identity

Description:

Allows a registered and active teacher to authenticate using OTP and access only their permitted academic responsibilities, as defined by role-based permissions.

User Stories:

US-AUTH-01: Teacher Login via OTP

As a Teacher,
I want to log in using OTP,
So that I can securely access my assigned academic work.

Acceptance Criteria:

- OTP is required for login.
- Only active teachers can log in.
- Inactive teachers are denied access.
- Successful login returns teacher identity and assignments.
- Permissions are enforced after login.

Feature: Daily Attendance Management

Description:

Allows teachers to record and correct daily attendance for students in their assigned sections, using date-based submissions with same-day edit control, ensuring accuracy, auditability, and reliable parent notification even under intermittent connectivity.

(User intent aligned with AttendanceCreate, AttendanceSubmitIn, AttendanceSubmissionOut, StudentAttendanceSummary)

User Stories:

US-ATT-01: Daily Attendance Entry

As a Teacher,
I want to mark attendance once per day for my assigned section,
So that student presence is recorded accurately.

Acceptance Criteria:

- Attendance requires student_id, date, and status.
- Attendance can be submitted only once per student per date.
- Teacher can mark attendance only for assigned sections.
- Submission confirmation is shown.
- Duplicate submissions for the same date are prevented.
- Only teachers with "mark_attendance" permission can submit attendance.

US-ATT-02: Same-Day Attendance Editing

As a Teacher,
I want to edit attendance on the same day,
So that mistakes can be corrected.

Acceptance Criteria:

- Attendance can be edited only on the same calendar day.
- Editing is disabled after the day ends.
- Edited submission replaces the previous record.
- Edit activity is auditable.
- Permission enforcement applies to edits.

US-ATT-03: Attendance Notifications to Parents

As a Parent,
I want to receive attendance updates,
So that I know my child's daily attendance status.

Acceptance Criteria:

- Absence notifications are generated automatically.
 - Daily attendance summary is generated.
 - Notifications are attempted via WhatsApp first.
 - SMS is used as fallback if WhatsApp fails.
 - Teachers do not manually trigger notifications.
-

Feature: Marks & Exam Performance Entry

Description:

Enables teachers to submit student marks for defined exam types using structured submissions, with mandatory remarks and consolidated parent communication after exam completion.

(User intent aligned with MarksRecordIn, MarksSubmissionIn, MarksSubmissionOut, StudentRecentResult)

User Stories:

US-MRK-01: Enter Marks for Exams

As a Teacher,
I want to enter marks for exams,
So that student academic performance is recorded.

Acceptance Criteria:

- Teacher can select exam type (Unit Test, Mid-term, Final).
- Marks can be numeric or grade-based.
- Marks can be entered only for assigned subjects and sections.
- All students must have marks entered before submission.
- Only teachers with "enter_marks" permission can submit marks.

US-MRK-02: Mandatory Remarks for Marks

As a Teacher,
I want to add remarks while submitting marks,
So that parents understand student performance.

Acceptance Criteria:

- Remarks are mandatory for marks submission.
- Submission is blocked if remarks are missing.
- Remarks are stored with the marks record.
- Remarks are included in consolidated results.

US-MRK-03: Consolidated Exam Results to Parents

As a Parent,
I want to receive consolidated exam results,
So that I can clearly review my child's performance.

Acceptance Criteria:

- Results are sent only after all subjects for the exam are completed.
- Individual subject marks are consolidated.
- Partial or subject-wise notifications are not sent.
- Results are delivered via WhatsApp and SMS.

Feature: Student Notes & Academic Continuity

Description:

Allows teachers to add structured, append-only notes to a student's profile to preserve academic and behavioral context across teacher changes.

(User intent aligned with StudentNoteCreate, StudentNoteOut, StudentProfileOut)

User Stories:

US-NOT-01: Add Student Notes

As a Teacher,
I want to add notes to a student profile,
So that important academic or behavioral context is preserved.

Acceptance Criteria:

- Notes can be added for students in assigned sections.
- Notes are append-only and cannot be edited or deleted.
- Notes are timestamped and attributed to the teacher.
- Notes remain visible to future assigned teachers.

Feature: Teacher Scope & Access Control

Description:

Ensures teachers can access only their own classes, sections, subjects, and students, with strict permission enforcement and backend validation.

(User intent aligned with TeacherMeOut, TeacherAttendanceSectionOut, TeacherAssignmentOut)

User Stories:

US-SEC-01: View Own Class and Assignments

As a Teacher,
I want to view only my assigned classes and subjects,
So that I work only within my responsibilities.

Acceptance Criteria:

- Teacher can view only assigned sections and subjects.
- Teacher cannot view or act on unassigned classes.
- Access is controlled by "view_own_class" permission.
- Backend enforces access even if UI is bypassed.

Feature: Reliability & Intermittent Internet Handling

Description:

Protects teacher submissions from duplication or loss during delayed or unstable connectivity, while preserving data correctness.

User Stories:

US-SYS-01: Safe Submission Under Connectivity Issues

As a Teacher,
I want my submissions to be protected during connectivity issues,
So that data is not lost or duplicated.

Acceptance Criteria:

- Duplicate submissions are prevented.
- Clear submission confirmation is shown.
- Incomplete submissions are not persisted.
- Backend validation ensures idempotency.

Testing Scope

- UI Testing:
 - Teacher authentication
 - Attendance entry & edit
 - Marks entry with remarks
 - Student notes entry
- Integration Testing:
 - Attendance submission & edit flows
 - Marks submission & result consolidation
 - Notification triggers (WhatsApp → SMS)
 - Permission enforcement (mark_attendance, enter_marks, view_own_class)

- Data integrity under retry conditions
