

VIDYATRACK FEATURES AND USER STORIES

ROLE: MANAGEMENT

Feature: Management Authentication & Dashboard Access

Description:

Allows authorized management users to authenticate securely and access a management dashboard to configure school structure, manage staff and students, and oversee academic data in a read-only capacity where applicable.

User Stories

US-MGT-AUTH-01: Management Login via OTP

As Management,
I want to log in using OTP,
So that I can securely manage school configuration and oversight tasks.

Acceptance Criteria:

- OTP is required for login.
- Only active management users can log in.
- Inactive management users are denied access.
- Successful login loads management dashboard.
- Permissions are enforced after login.

Feature: School Academic Structure Setup

Description:

Enables management to define and maintain the school's academic structure, including classes, sections, and subjects, which forms the foundation for attendance and marks workflows.

User Stories

US-MGT-01: Create and Manage Classes

As Management,
I want to create and manage classes,
So that the school's academic hierarchy is defined.

Acceptance Criteria:

- Management can create classes.
- Management can view existing classes.
- Duplicate class names within the same school are prevented.
- Only users with "manage_classes" permission can perform this action.

US-MGT-02: Create and Manage Sections

As Management,
I want to create and manage sections under classes,
So that students and teachers are organized correctly.

Acceptance Criteria:

- Management can create sections under a class.
- Sections are linked to exactly one class.
- Duplicate section names within the same class are prevented.
- Only users with "manage_classes" permission can perform this action.

US-MGT-03: Create and Manage Subjects

As Management,
I want to create and manage subjects,

So that academic subjects are defined for teaching assignments.

Acceptance Criteria:

- Management can create subjects.
- Subjects are viewable after creation.
- Duplicate subject names are prevented.
- Only users with "manage_subjects" permission can perform this action.

Feature: Staff Registration & Lifecycle Management

Description:

Allows management to register, activate, deactivate, and replace teachers and principals while preserving academic data continuity.

User Stories

US-MGT-04: Register Teachers

As Management,
I want to register teachers,
So that they can access the system.

Acceptance Criteria:

- Management can create teacher profiles.
- Newly created teachers are inactive by default.
- Registered teachers appear in staff list.
- Only users with "manage_teachers" permission can perform this action.

US-MGT-05: Register Principal

As Management,
I want to register a principal,
So that the school has academic leadership access.

Acceptance Criteria:

- Management can register a principal.
- Only one active principal is allowed at a time.
- Registered principal appears in staff list.

- Only users with "register_principal" permission can perform this action.

US-MGT-06: Activate and Deactivate Teachers

As Management,
I want to activate or deactivate teachers,
So that staff availability is controlled.

Acceptance Criteria:

- Management can mark a teacher as active or inactive.
- Inactive teachers cannot log in.
- Inactive teachers cannot mark attendance or enter marks.
- Status changes take effect immediately.
- Only users with "manage_teachers" permission can perform this action.

US-MGT-07: Replace an Inactive Teacher

As Management,
I want to assign another registered teacher when a teacher becomes inactive,
So that academic continuity is maintained.

Acceptance Criteria:

- Replacement teacher must be active.
- Replacement teacher can be assigned to the same subjects and sections.
- Student attendance, marks, and notes remain unchanged.
- No historical academic data is deleted.
- Only users with "manage_teachers" and "assign_subjects" permissions can perform this action.

Feature: Teaching Assignment Management

Description:

Allows management to assign teachers to subjects and sections, defining who is responsible for attendance and marks entry.

User Stories

US-MGT-08: Assign Teachers to Subjects

As Management,
I want to assign teachers to subjects and sections,
So that academic responsibilities are clearly defined.

Acceptance Criteria:

- Management can assign subjects to teachers.
- Teachers must be active to receive assignments.
- Assignments are viewable after creation.
- Teachers can act only on assigned subjects and sections.
- Only users with "assign_subjects" permission can perform this action.

Feature: Student Management

Description:

Enables management to create and maintain student records, ensuring students are correctly enrolled and available for academic workflows.

User Stories

US-MGT-09: Create and Manage Students

As Management,
I want to create and manage student records,
So that students can participate in academic activities.

Acceptance Criteria:

- Management can create student profiles.
- Student records include personal and guardian details.
- Students are assigned to classes and sections.
- Only users with "manage_students" permission can perform this action.

Feature: Academic Oversight (Read-Only)

Description:

Provides management with read-only access to attendance, marks, and student profiles for monitoring and governance purposes.

User Stories

US-MGT-10: View Academic Records

As Management,
I want to view attendance, marks, and student profiles,
So that I can monitor academic performance.

Acceptance Criteria:

- Management can view attendance records.
- Management can view marks and remarks.
- Management can view student personal and academic details.
- Management cannot edit or delete academic data.
- Access is controlled by read-only permissions (attendance, marks, student_profile).

Feature: Parent Communication

Description:

Allows management to send custom communications to parents for administrative or academic purposes using approved channels.

User Stories

US-MGT-11: Send Parent Communications

As Management,
I want to send messages to parents,
So that I can communicate important information.

Acceptance Criteria:

- Management can compose custom messages.
- Messages can be sent via WhatsApp and SMS.
- Message delivery status is visible.
- Academic data cannot be modified from messaging flow.

Feature: Management Access Control & Locking

Description:

Allows authorized management users to lock management-level configuration actions to prevent unintended changes.

User Stories

US-MGT-12: Lock Management Access

As Management,
I want to lock management configuration access,
So that critical setup actions are restricted when required.

Acceptance Criteria:

- Only users with "lock_management_access" permission can enable or disable the lock.
- When locked, setup actions (classes, subjects, staff, assignments) are blocked.
- Read-only access to academic data remains available unless explicitly restricted.
- Lock status is visible to management users.

Testing Scope

- UI Testing:
 - Management authentication
 - Class, section, subject setup
 - Teacher and principal registration
 - Student creation
 - Assignment workflows
 - Parent communication
- Integration Testing:
 - Permission enforcement (manage_classes, manage_subjects, manage_teachers, manage_students, assign_subjects, register_principal, lock_management_access)
 - Teacher activation/deactivation and replacement
 - Read-only enforcement for academic data
 - Data integrity across teacher replacement
